

Robotic System for Humanitarian Demining Operations

- More than 100 million landmines in 70 countries maim and kill 27,000 per yer, mostly women and children
- Detection and imaging of metallic and non-metallic landmines
- Eliminate time-consuming and dangerous hand probing
- Safe and efficient robotic detection and removal

Commercialization Started

Horizon, Inc.

Raton, NM

SPEKTR

Chelyabinsk-70, Russia
